<https://elianrc.github.io/>

Profile

Self-taught web developer and life-long learner started at Silicon Valley currently looking for web development remote positions where I can contribute to a community or service that I believe in.

Skills

C - HTML5 - CSS3 - Javascript - Python - SQL - Docker

Projects

ft_server - Set up a web server using Docker that runs multiple services like Wordpress, phpMyAdmin and SQL database. https://github.com/elianrc/ft_server

TV Show Search App - A simple web app that shows you movie posters for whatever you search using TV Maze API. <https://github.com/elianrc/tv-show-search>

Speller - C program that spell-checks a file using a hash table data structure to load and manage a dictionary with more than 100,000 words. <https://github.com/elianrc/Speller>

Pricing Table - A simple and modern pricing table design made using HTML5 and CSS3. Responsive design with media queries. <https://github.com/elianrc/pricing-table>

DNA Identifier - Program that identifies a person based on their DNA by reading data from a CSV file using python. <https://github.com/elianrc/dna-identifier>

Experience

WEB DESIGNER | CROSS-CULTURAL MISSIONS | JAN 2021 - PRESENT

Cross-Cultural Mission is a non-profit organization. As the web designer my core activities include:

- Redesigning the whole website to improve the UX for both desktop & mobile.
- Planning site design, functionality, navigation, and content.
